Functional & Performance Testing Template

Model Performance Test

Date	21 February 2025
Project Name	Employee Raise Issue – Record Producer & Service Portal Widget
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Category & Subcategory Field Validation	Select different categories on the Record Producer and check the Subcategory choice list.	Subcategory list updates to show only options relevant to the selected category (e.g. Network → VPN).	Subcategory list updates to show only options relevant to the selected category (e.g. Network → VPN).	pass
FT-02	Mandatory Field Validation (Short Description)	Try to submit the form leaving the short description field blank.	Submission is blocked with a validation message until short description is filled.	Submission is blocked with a validation message until short description is filled.	Pass
FT-03	Issue Submission (Record Producer)	Fill in all required fields (category, subcategory, description) and click Submit.	A new record is created in the Employee raise issue table with the correct field values.	A new record is created in the Employee raise issue table with the correct field values	Pass
FT-04	Auto-Assignment & Priority Check	Submit issues under different categories and check the resulting record.	Issue is routed to the correct HR/IT assignment group with the correct priority set.	Issue is routed to the correct HR/IT assignment group with the correct priority set.	Pass
PT-01	Response Time Test	Use a timer to measure how long the Record Producer takes to load and submit.	Form should load and submit within 3 seconds.	Form should load and submit within 3 seconds.	pass

PT-02	Concurrent Submission Test	Have multiple employees submit issues on the portal at the same time.	Portal and Record Producer remain responsive; no records are lost or duplicated.		
PT-03	Attachment Upload Load Test	Attach and upload multiple or large files (e.g. screenshots, PDFs) to an issue.	Upload completes without errors, timeouts, or the portal becoming unresponsive.		

Note: *Actual Result and Pass/Fail should be completed after the tests above are run against the deployed Record Producer and Service Portal widget.*
