User Acceptance Testing (UAT) Template

Date	21 February 2025
Project Name	Employee Raise Issue – Record Producer & Service Portal Widget
Maximum Marks	

Project Overview:

Project Name: Employee Raise Issue – Record Producer & Service Portal Widget
Project Description: Configuring a Record Producer for the Employee Raise Issue custom table, integrated with a Service Portal widget, so employees can raise workplace issues (payroll, access, infrastructure, HR policy) in a guided, structured way with automatic routing and prioritization.
Project Version: v1.0 (MVP)
Testing Period: 17 February 2025 to 21 February 2025

Testing Scope:

• Record Producer “Raise Employee Issue”: Category → Subcategory dependency, mandatory short description (UI Policy), attachments
• Auto-assignment to HR/IT group and priority calculation based on category, impact and urgency
• Employee Center Service Portal page, left widget (service info) and right widget (“Raise Issue” button)
• Notification to the employee on issue state change
• User stories USN-1 through USN-10 (see Data Flow Diagram & User Stories document)

Testing Environment:

URL/Location: Employee Center Service Portal (e.g. https://<instance>.service-now.com/esc) **Credentials (if required):** Test employee login provided by the ServiceNow admin

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Raise a new issue with valid inputs	1. Open Employee Center Service Portal 2. Click "Raise Issue" 3. Select category, subcategory, enter description 4. Click Submit	Issue is created successfully with a confirmation message shown to the employee	Record INC01451 was created successfully with Number, State = New and the entered details saved	Pass
TC-002	Attempt submission with mandatory field missing (negative)	1. Open Record Producer 2. Leave short description blank 3. Click Submit	Submission is blocked with a validation message; no record is created		

TC-003	Category → Subcategory dependency	1. Select a category (e.g. Network) 2. Check the Subcategory list	Subcategory list shows only options relevant to the chosen category (e.g. VPN)	Category = Software was saved with Subcategory = Laptop, which belongs	pass
Test Case ID	**Test Scenario**	**Test Steps**	**Expected Result**	**Actual Result**	**Pass/Fail**
				to Hardware, not Software	
TC-004	Auto-assignment to correct group	1. Submit issues under different categories 2. Check the assignment group on each record	Each issue is routed to the correct HR/IT assignment group	Assignment Group field was blank on the created record (INC01451)	Fail
TC-005	Priority calculated correctly	1. Submit issues with varying impact/urgency 2. Check the Priority field on the record	Priority (Critical/High/Medium/Low) reflects impact and urgency correctly	Priority field showed "--None--" on the created record instead of a calculated value	Fail
TC-006	State change notification	1. Have HR/IT update an issue's state 2. Check the employee's email/notification	Employee receives a notification when the issue state changes		
TC-007	Attachment upload	1. Raise an issue 2. Attach a screenshot or document 3. Submit	Attachment is saved against the created record and is viewable by HR/IT		
TC-008	View issue status (negative access check)	1. Log in as a different employee 2. Attempt to view another employee's issue	Access is denied; employee can only see their own submitted issues		

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Priority field remains "--None--" after saving a new Employee Raise Issue record	1. Open Record Producer 2. Fill category, subcategory, description 3. Click Submit 4. Open the created record	High	Open	Priority should be autocalculated from impact/urgency per the Business Rule; currently left blank on save.
BG-002	Assignment Group is not populated on record creation	1. Submit an issue under any category 2. Open the created record 3. Check Assignment Group field	High	Open	Auto-assignment Business Rule does not appear to be setting the group based on category.

BG-003	Subcategory value is not restricted to the selected Category’s mapped options	1. Open Record Producer 2. Select Category = Software 3. Check Subcategory field/options selected	Medium	Open	Record INC01451 was saved with Category = Software and Subcategory = Laptop, but Laptop is mapped under Hardware, not Software. Verify the dependent choice list / UI Policy filtering logic.

Notes:

Ensure that all test cases cover both positive and negative scenarios.
Encourage testers to provide detailed feedback, including any suggestions for improvement.
Bug tracking should include details such as severity, status, and steps to reproduce.
Obtain sign-off from both the project manager and product owner before proceeding with deployment.
